

B-GATE Report — S035

Plain-English Summary

This report evaluates the **adoption readiness** and **governance quality** of a blockchain deployment scenario. The output is a standardized score that helps compare different governance designs and identify risk areas.

Key Result

- **B-GATE Index:** 58.04/100
- **Rating:** YELLOW (Moderate governance/adoption risk)
- **Penalty points:** 0.0
- **Penalty reasons:** None

Score Breakdown

- **ARS (Adoption Readiness):** 38.16/100
- **GQS (Governance Quality):** 66.1/100
- **TSS (Trustworthiness & Sustainability):** 74.68/100

Scenario Description (Benchmark Input)

- Domain: interbank_settlement
- Governance model: single_operator
- Stakeholders: 6
- Trust asymmetry: 2 / 5
- Data sensitivity: 2 / 5
- Dispute frequency: 0 per month
- Regulatory pressure: 1 / 5
- Adoption stage: pilot

Governance Evidence Flags (Binary)

- Incident response present: 1
- Upgrade policy present: 1
- Dispute process present: 1
- Decision rights clarity: 1 (0 unclear, 2 clear)

Notes for Non-Technical Readers

- A high score means the scenario has **clear rules**, **accountability**, and **operational readiness**.
- Penalties occur when essential governance policies are missing (incident response, upgrades, dispute resolution).
